Course Plan - EK381 Summer 2025

Week One 1.1 Set Theory 16 1.2 Probability Axioms 21 1.3 Conditional Probability Concepts 15 1.4 Conditional Probability Examples 11 1.5 Independence 16 1.6 Counting 13 Week Two 2.1 Discrete Random Variables 22 2.2 Discrete Random Variables: Cumulative Distribution Function 11 2.3 Expectation for Discrete Random Variables 16 2.4 Variance for Discrete Random Variables 11 2.5 Important Families of Discrete Random Variables 21 2.6 Conditioning for Discrete Random Variables 18 3.1 Continuous Random Variables 21 3.2 Expectation and Variance for Continuous Random Variables 13 Week Three 3.3 Important Families of Continuous Random Variables 14 3.4 Conditioning for Continuous Random Variables 13 4.1 Pairs of Discrete Random Variables 16 4.2 Conditional PMF 14 4.3 Pairs of Continuous Random Variables 14 4.4 Conditional PDF 12 4.5 Independence of Random Variables 15

```
Week Four
4.6 Expected Value of a Function of Random Variables 14
4.7 Conditional Expectation 17
5.1 Covariance 16
5.2 Correlation Coefficient 8
5.3 Jointly Gaussian Random Variables - Concepts 12
5.4 Jointly Gaussian Random Variables - Examples 8
5.5 Random Vectors 16
5.6 Gaussian Vectors 7
Week Five
6.1 Binary Hypothesis Testing - Concepts 18
6.2 Binary Hypothesis Testing - Examples 9
6.3 Likelihood Ratio 17
6.4 Detection with Vector Observations 11
7.2 Linear Estimation 14
7.3 Vector Estimation 8
Week Six
8.1 Sums of Random Variables 11
8.2 Limits of Random Variables 10
9.1 Confidence Intervals - Concepts 14
9.3 Significance Testing - Concepts 13
10.1 Machine Learning Overview 15
10.2 Binary Classification 17
10.3 Dimensionality Reduction 11
11.1 Markov Chains 13
11.2 State Vector and Transition Matrix 13
11.3 State Classification 18
11.4 Unique Limiting State Vector 11
```

Final Exam
